

Part D evaluation check list

Owner:.....

Marked by:

Evaluate Part D video file only – no documentation needed for this part

- video is 5-7min long
It shows the proper working of the final solution (not code)

- video shows success criteria
Script should focus on success criteria and how your program meets them explicitly

- video shows testing the success criteria using Part B's test plan
Script should explicitly say which test and which success criteria you are proving each time

- comprehensive evidence of the solution's functionality with lots of data
Lots of data/runs are shown to prove it works for many situations/eventualities/extremes

- data entry is skipped/fast-forwarded
Tedious data entry avoided

- sound audible at normal volumes
Video was tested and audio levels are at normal levels

- video zoomed into relevant area
Video is not unnecessarily large/resolution is restricted to app/program to make it easy to see what is being tested.

- extensibility shown in code at end of video
Video concludes with by showing a two/three specific parts in your code where your program can be extended to better meet the client's future needs.
