Network fundamentals
IB Computer Science
HL Topics 1-7, D1-4

1: System design
2: Computer Organisation
3: Networks
4: Computational thinking

5: Abstract data structures
6: Resource management
7: Control
D: OOP
HL & SL 3 Overview

Network fundamentals
3.1.1 Identify different types of networks
3.1.2 Outline the importance of standards in the construction of networks
3.1.3 Describe how communication over networks is broken down into different layers
3.1.4 Identify the technologies required to provide a VPN
3.1.5 Evaluate the use of a VPN

Data transmission
3.1.6 Define the terms: protocol, data packet
3.1.7 Explain why protocols are necessary
3.1.8 Explain why the speed of data transmission across a network can vary
3.1.9 Explain why compression of data is often necessary when transmitting across a network
3.1.10 Outline the characteristics of different transmission media
3.1.11 Explain how data is transmitted by packet switching

Wireless networking
3.1.12 Outline the advantages and disadvantages of wireless networks
3.1.13 Describe the hardware and software components of a wireless network
3.1.14 Describe the characteristics of wireless networks
3.1.15 Describe the different methods of network security
3.1.16 Evaluate the advantages and disadvantages of each method of network security
Topic 3.1.5

Evaluate the use of a VPN
VPN = Virtual Private Network

- It uses the internet to allow people to log into a network remotely and access its resources, but encrypts the connection to thwart eavesdroppers.
- If your company sets you up with a VPN, you can access your corporate intranet, file servers or email from home or a coffee shop – just as if you were using it in your office.
- This makes VPN a popular way to support remote workers, especially in fields where privacy is paramount, such as health care.

See 3.1.1
VPN
The rise of telecommuting

- Through a VPN, it is possible to connect to a LAN that is protected from outside access through the internet.
- Therefore, it is possible for workers to connect to a company's internal network from almost anywhere in the world.
- This gave rise to home offices, as many office jobs do not require consultation and hence can be completed from home.
- This remote working is also called telecommuting.
**Exam note!**

This curriculum point requires you to **evaluate** the different options.

That is exam speak for **knowing/discussing advantages, disadvantages** and for **comparing** them against one another to arrive at a conclusion.
A perspective on telecommuting
